TOOLS

- Bash
- Git & Github
- Chrome DevTools
- MongoDB
- Postman

LANGUAGES

- English
- Bahasa Indonesia

ABOUT

Software development has never been "just work" for me, it has allowed me to challenge myself continually and progressively - be it learning new technologies or planning that next big project! What started with a simple "Hello World!" turned to be one of my greatest joys that only gets more exciting as years go by.

EXPERIENCE

MACHIO'S PUB & GYM

A website for "Machio's Pub and Gym", highlighting the menu, gym facilities, and more restaurant related details. Used React to build the whole site.

Code   *Live Site*

PROJECC

A real-time text messaging web app inspired by Discord. Used React for frontend, Express for API, Socket.io for websocket communication and MongoDB database.

Code   *Live Site*

SAIKO GAMES

A video game information website. Used React for frontend, React Router for routing, IGDB API to fetch game data and Express for API.

Code   *Live Site*

DEVIL'S ADVOCATE

An e-commerce website for One Piece's devil fruits. Used React for frontend, Express for API, MongoDB database, and data scraped with Scrapy.

Code   *Live Site*
